Mission/Vision

At PACE, our mission is to help people with disabilities find meaningful employment.

Overview of Services

Our experts assist families and their loved ones in achieving this goal by walking them through our proven process.

Step 1: A person with a disability comes to PACE and is evaluated and counseled to determine talents and career goals.

Step 2: Training is provided to polish the individual's unique talents and overcome obstacles.

Step 3: Finally, the person is either introduced to a local employer or is employed in one of PACE's business opportunities.
